

Solar to 110V Conversion Guide

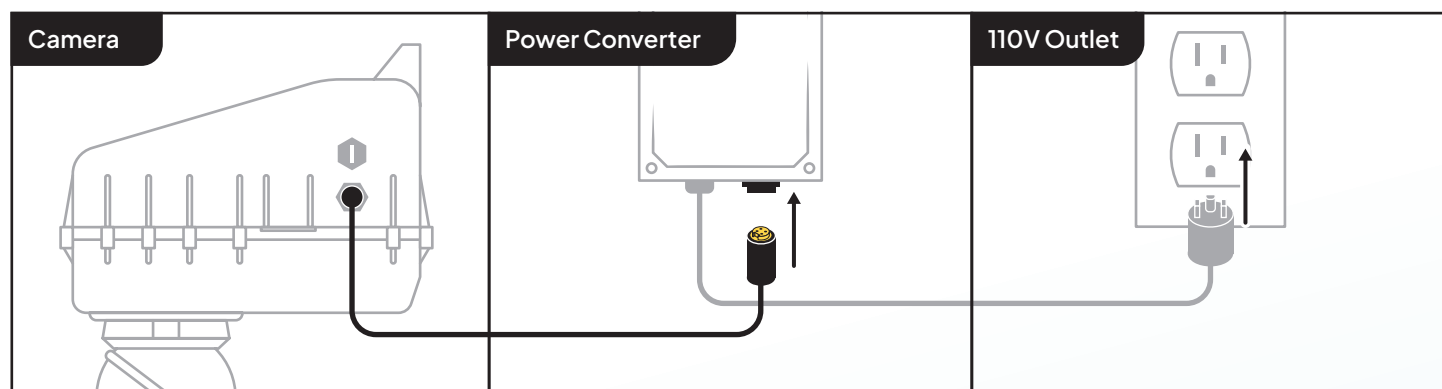

STEP 1

Locate the cable that connects the camera (or control box, if applicable) to the battery enclosure. Gently unscrew to disconnect cable from battery enclosure.

STEP 2

Align notches and carefully screw the cable end into the power converter.

STEP 3

Provide power by plugging the power converter into a **110V power** outlet. The battery enclosure and solar panel(s) can be stored for future use.
